

HAITIAN
ABSOLUTE

TRAINING SCHEDULE 2024

TECHNOLOGY AND KNOWLEDGE TO THE POINT

One computer per attendee per year

PROCESSING CLASSES FOR ALL MACHINE MODELS

Designed for entry-level technicians to help maximize production and improve efficiency

- Introduction to machine control screens
- Machine set-up overview
- Machine operation overview
- Introduction to processing
- Scientific approach to molding
- Decoupled molding principles
- Process capability studies
- Calculating the proper tonnage
- Material types
- Molding principles
- Reject analysis
- Basic machine best practices and techniques

January 9 – 11

Phoenix, AZ

February 6 – 8

Batavia (Chicago), IL

March 5 – 7

Parma (Cleveland), OH

March 26 – 28

Moncks Corner (Charleston), SC

April 30 – May 2

Worcester (Boston), MA

May 14 – 16

Phoenix, AZ

June 4 – 6

Batavia (Chicago), IL

July 9 – 11

Parma (Cleveland), OH

August 6 – 8

Moncks Corner (Charleston), SC

August 27 – 29

Worcester (Boston), MA

September 24 – 26

Phoenix, AZ

October 22 – 24

Moncks Corner (Charleston), SC

November 19 – 21

Parma (Cleveland), OH

December 17 – 19

Worcester (Boston), MA

TROUBLESHOOTING FOR KEBA CONTROLS

Designed for entry-level maintenance technicians to maximize uptime and machine performance

- Machine maintenance and troubleshooting
- Electrical and hydraulic components and schematics
- Safety circuit analysis and troubleshooting
- Preventative maintenance concepts
- Developing a plan: Logical troubleshooting methods
- Testing equipment operation and application including dial indicators, micrometers, pyrometers
- Basic machine best practices and techniques

January 23 – 25

Moncks Corner (Charleston), SC

March 12 – 14

Phoenix, AZ

June 18 – 20

Worcester (Boston), MA

August 13 – 15

Batavia (Chicago), IL

October 8 – 10

Moncks Corner (Charleston), SC

December 3 – 5

Worcester (Boston), MA

TROUBLESHOOTING FOR SIGMATEK CONTROLS

Designed for entry-level maintenance technicians to maximize uptime and machine performance

- Machine maintenance and troubleshooting
- Electrical components and schematics
- Safety circuit analysis and troubleshooting
- Preventative maintenance concepts
- Developing a plan: Logical troubleshooting methods
- Testing equipment operation and application including dial indicators, micrometers, pyrometers
- Basic machine best practices and techniques

February 27 – 29

Worcester (Boston), MA

April 16 – 18

Batavia (Chicago), IL

May 21 – 23

Moncks Corner (Charleston), SC

July 23 – 25

Phoenix, AZ

September 10 – 12

Parma (Cleveland), OH

November 5 – 7

Worcester (Boston), MA

- \$1,250 per attendee per class
- 25% group discount for 4 or more from the same company

Customized training at customers' location
for unlimited # of attendees starting at \$12,500.
